

CASE STUDY

Pips Place, Chiltern Hills

Project Overview

This classical Georgian-style country house needed a garden of equal stature and was designed by Jo Alderson Phillips who wanted a fabulous entrance with glimpses of the garden beyond through arches in the hedges and intriguing doorways. The garden was built by Rob Jones and his incredible in house team at The Garden Design Company Ltd. The property has several acres with far-reaching views and phase 1 was a secret garden built on the site of an abandoned tennis court. The gardens at Levens Hall have certainly been an influence; the succession of yew topiary domes have all been anchored using the Rootball Fixing System with Plati-Mat and were supplied by Solitair in Belgium each weighing two tonnes. Specimen Cornus and Acer Bloodgoods were similarly anchored as well as a specimen Pinus Syvestris Watereri which are thriving despite the North facing aspect 200m above sea level. Subsequent phases included panels of Malus Everest where the above ground guys (Guy Fixing System) were used with the Deadman Fixing System with Plati-Mat securing multi stemmed birch in dramatic large copper urns from Architectural Heritage. Phase 3 is currently being completed with a 450m² wildlife pond complete with boardwalk, jetty and 84T of Caledonian Boulders nestling into the landscape.
